

MOODLE

ENROLMENT PLUGINS

Easy
Moderate
Advanced

STARTERS

Manual enrolments _____ CORE

Add users to courses manually by searching from a list of users. 🍴

Self enrolments _____ CORE

Users can sign up for a course themselves (with or without an enrolment key). 🍴

Guest access _____ CORE

Anyone can view the contents of a course but can't participate in any activities. 🍴

MAINS

Cohort sync _____ CORE

Users in a cohort (site-wide group) are enrolled to a course, either manually or automatically. 🍴

Category enrolments _____ CORE

Users are enrolled to a category which cascades to each course within that category. 🍴

Flat File _____ CORE

Enrol users in bulk using a CSV file from a specific server location. 🍴

Course meta link _____ CORE

Enrol users with parent and child courses (enrolments can be passed from one course to another). 🍴

Paypal _____ CORE

Users can enrol and pay for a course via Paypal. 🍴

LDAP enrolment _____ CORE

Enrol users onto courses using LDAP fields. 🍴🍴

External database _____ CORE

Enrol users from an external data source such as MySQL, MSSQL, Oracle, Postgres and more. 🍴🍴

SPECIALS

MNet remote enrolments _____ CORE

Establish a link with another Moodle site, share resources and enrol users. 🍴🍴🍴

Publish as LTI tool _____ CORE

Allow users on different sites (including non-Moodle LTI consumer sites) to access selected courses. 🍴🍴🍴

IMS Enterprise File _____ CORE

Use an international standard XML file to control user enrolments on a course. 🍴🍴

SIGNATURE DISHES

Auto enrol _____ FREE

Automatically enrol users to a course upon login or visiting a course. 🍴

Enrol by user profile field _____ FREE

Users are automatically enrolled on courses based upon values in their user profile. 🍴

Course completed enrolment _____ FREE

Users are enrolled to a course based on the completion of another course. 🍴

DESSERTS

Badge enrolment _____ FREE

Users are enrolled to courses upon receiving a badge. 🍴

Enrolment upon approval _____ FREE

Users are enrolled upon approval and emailed once approved. 🍴

Auto enrolment (via activity) _____ FREE

Enrol a user when they visit a course or complete an activity. 🍴
